TRADERS **NEWSBOX**

MEMBER GUIDE

Your markets. In your Discord.

The market moved. You weren't slow, you were looking somewhere else. Set this up once and the feeds you trade land in your Discord.

Choose your news

CRYPTO · FOREX · EQUITIES · COMMODITIES · MACRO · RATES · CONFLICTS · + 50 MORE

Loud on what you trade. Quiet on the rest.

NEWS. You Choose.

Go to Website ↗

Go to Discord ↗

START HERE.

Before you start

1. **Get Discord.** It's free. Grab the app from discord.com or use it in your browser.
2. **Make an account.** An email and a password. That's it.
3. **Come in.** Go to tradersnewsbox.com and tap **Start free**.

Discord in 2 minutes

Six ideas and you're set. Same on the app, the web and your phone.

1 Server

Traders Newsbox is one server: your market newsroom inside Discord.

2 Categories

The headings down the left: CRYPTO, FOREX, EQUITIES and more.

3 Channels

The rooms inside each category. Tap one to open it.

4 Roles

Free, Pro or Elite. Your plan decides which feeds you can open.

5 Threads

Your private space. Only you can see it.

6 On your phone

Swipe right to see the channel list.

FIRST STEPS.

Your first five minutes

Do these once, in this order, and you're set.

1. **Get in**
   `#verify` — tap the green button. Everyone does it once; it keeps the bots out.

2. **Read the rules**
   `#rules` — a one-minute read that points you to the next step.

3. **Find your way round**
   `#start-here` — your map of the server and your plan.

4. **Choose your feeds**
   `#free-desk` — on Free, pick your one live feed.
   FEED TOGGLE — on Pro or Elite, switch any feed on or off. It's in the sidebar.

5. **Set your pings**
   The next page shows how to hear about what you trade.

Paid on Whop? If you ever leave the server and come back, open Whop → Traders Newsbox → **Join Discord**. Your plan comes straight back.

DISCORD TIPS.

Pings your way

Two settings, 30 seconds, and TNB only buzzes you about what you trade.

1. Right-click the server icon → **Notification Settings** → **Only @mentions**
2. Right-click `#announcements` → **All Messages**

Then, feed by feed

Louder

Right-click the feed → All Messages

Quieter

Right-click the feed → Notification Settings → Nothing

Done with it (Pro and Elite)

Switch it off in FEED TOGGLE

On your phone, long-press a channel for the same menu.

`#discord-tips` — more tips.

What you get

Free is a real plan, not a teaser. Move up when one feed isn't enough. Pay yearly and get **2 months free**.

Free

`$0`
`no card`

- One live feed of your choice
- Every market-mover, 30 minutes behind
- Live economic calendar
- The Daily Digest every evening

Pro

`$29/mo`
`$290/yr`

EVERY FEED

- Every feed, live and time-stamped
- My Desk: your countries and up to 5 tickers
- #members-chat with other traders
- 7-day free trial on Pro monthly. Cancel anytime.

Elite

`$69/mo`
`$690/yr`

- Everything in Pro
- Your own AI analyst on Fed, ECB, CPI, jobs and PCE: what it means, and the risks
- Briefs before Tokyo, London and New York, plus a weekly review
- Unlimited tickers on My Desk
- Live audio squawk

`#upgrade` — upgrade or change plan any time.

MY DESK.

NEWS. You Choose.

Pro and Elite members only. Your own private space that only you can see.

1. **Data: the numbers for your countries**
   The economic releases that move markets: inflation, jobs, GDP, rate decisions. Each one lands with the result against the forecast.
   `#my-data` — pick the countries you follow.

2. **Feeds: the news on what you hold**
   When a story names one of your tickers, it's copied into your private thread from the feeds your plan opens.
   `#my-feeds` — add the tickers you trade. Pro holds up to 5; Elite has no limit.

3. **What you see**
   One private thread with your data and your feeds together. Nobody else can see it.

Quiet ticker? A ticker only posts when a story names it, so smaller names can go days without news.

On a free trial? About 2 days before your first charge, we post a reminder in your thread with a link to manage or cancel.

Squawk: every market, one line

Every market-moving headline in one channel, one line each, live.

#live-squawk
Pro and Elite. Every headline, live.

#free-squawk
Free. The same headlines, 30 minutes behind.

Audio squawk (Elite)

Hear the headlines read out while you trade.

1. `listen here` — join the voice channel first.
2. `#summon-the-bot` — type **/join** and press Enter.
3. That's it. Each headline is read aloud as it lands. Leave it running.

HELP & SUPPORT.

Quick answers

I'm new to Discord. Where do I start?
Pages 2 and 3. Channels are down the left; tap one to read it.

Someone mentioned a channel I can't see.
It comes with a higher plan. See page 5, or #upgrade.

Audio squawk is silent.
Join listen here first, then type **/join** in #summon-the-bot.

I'm getting too many notifications.
Set the server to Only @mentions, then turn up just the feeds you trade. See page 4.

I added a ticker and nothing has arrived.
It posts when a story names that ticker. Quieter names can go days without one.

I left the server, came back and lost my plan.
Open Whop → Traders Newsbox → Join Discord. Your role comes straight back.

How do I cancel or change my plan?
On Whop, open your Traders Newsbox membership and choose Manage.

Is this financial advice?
No. We report what happened. We never tell you what to buy or sell.

Can I earn by sharing TNB?
Yes: 30% of what the people you refer pay, every month they stay. See #earn-30.

WE'RE HERE

Stuck? Ask us.

Help

Post in **#help-and-support**, or email **support@tradersnewsbox.com**.

Stay safe

The team will never DM you first, or ask for money, logins or links. If someone does, it's a scammer. Report them in **#help-and-support**.

Not financial advice

We report what happened. We never tell you what to buy or sell, and we don't guarantee outcomes.
